Содержание

Предисловие 4
Список предыдущих выпусков библиографических указателей по альгологии 7
Указатель таксонов водорослей 9
Алфавитный список родов 434
Указатель авторов таксонов (в сокращенной и полной форме) 450

Предисловие

Настоящий указатель представляет собой второй выпуск[1] списка названий водорослей, приведенных в отечественной альгологической и смежной с ней литературе, а также в иностранных работах, посвященных исследованию водорослей, обитающих на территории нашей страны. Указатель является справочным аппаратом к специальному выпуску по водорослям за 1961-1970 гг.[2] Он состоит из перечня латинских названий водорослей, сопровождаемых номерами, под которыми в библиографии значатся работы, содержащие сведения о водорослях.

Основу указателя составляет алфавитный перечень родов водорослей, а также видов внутри каждого рода и внутривидовых таксонов в пределах каждого вида, независимо от их ранга. Если встречаются формы внутри разновидностей и субформы внутри форм, то формы помещаются под разновидностями, а субформы – под формами. Все внутривидовые таксоны располагаются после тире: разновидности и формы от вида идут после одного тире, указывающего на их принадлежность к вышерасположенному виду, формы от разновидностей – соответственно после двух тире.

В указатель вошли встреченные в литературе названия водорослей, независимо от современной трактовки их как действительных

---

1 Первый выпуск см.: Голлербах М.М., Красавина Л. К. Водоросли : Сводный указатель к отечественным библиографиям по водорослям за 1737-1960 гг. – Л., 1971. – 624 с.

2 Библиография советской литературы по водорослям. 1961-1970. – Л., 1983. – 580 с.

таксонов или как синонимов. Для ранга внутривидовых таксонов указателе сохранены только общеупотребительные в современной литературе обозначения, узаконенные „Международным кодексом ботанической номенклатуры": subsp., var., f., subf.; иногда встречающиеся еще обозначения таксонов ниже вида передаются с помощью букв греческого или латинского алфавитов, а некоторые оригинальные авторские обозначения, не поддающиеся подобному приравниванию, оставлены так, как они даны в работе.

При выборке названий водорослей для данного алфавитного указателя были приняты те же правила, что и для первого выпуска, а именно:

1. Из флористических и систематических работ выписывались только основные виды, разновидности и формы, обнаруженные на исследованной территории; встречающиеся в этих работах синонимы или названия водорослей, упоминаемые лишь в связи с обсуждением основных таксонов, не учитывались.

2. Из экспериментальных, теоретических и иных работ общего содержания выписывались все названия водорослей, независимо от их местонахождения.

3. В указатель не включены названия водорослей, содержащиеся в учебниках, альгологических сводках, монографиях и определителях, являющихся настольными руководствами и справочниками для каждого альголога.

4. В написаниях латинских названий водорослей, в случаях наличия явных погрешностей, связанных с опечатками, вносились исправления, возможность и необходимость которых предусмотрена „Международным кодексом ботанической номенклатуры". Орфографически ошибочные названия, имеющие неясную для составителей настоящего справочника этимологию, не исправлялись.

5. При номерах работ, в которых имеется описание соответствующей водоросли, в круглых скобках дается обозначение „о", при наличии рисунков – „р".

В связи с обширностью материала для облегчения нахождения родов водорослей в конце указателя дан алфавитный список родов с обозначением страниц, на которых они помещены.

В отличие от предыдущего выпуска, в данный указатель внесены следующие дополнения:

После номеров работ, в которых были обнаружены ошибки в написании родов и других таксономических единиц, поставлены звездочки.

Названия таксонов даны с фамилиями авторов в общепринятом их сокращении.

В конце указателя дан алфавитный список фамилий авторов таксонов. При наличии 2-3 авторов-однофамильцев, фамилии которых одинаково сокращены в названиях разных таксонов в указателе, в основном, оставлены с теми сокращениями фамилий авторов, какие были в исходных работах.

В процессе работы большую помощь в филологической проверке названий и исправлениях номенклатурных погрешностей оказала Н.Н.Забинкова, за что приносим ей искреннюю благодарность.

Все замечания, связанные с данным указателем, следует посылать по адресу: 197022, Ленинград, ул. проф. Попова, 2, Ботанический институт АН СССР, Лаборатория альгологии.
